ABOUT ME

Graduate Computer Science Student, focus on and pursuing a masters about software engineering and machine learning.

One of my goals in life is to advance my career to the absolute limit of my capabilities and I would rather enjoy the destination than the trip to that.

STRENGTHS

Extreme stubbornness until the job/task is done

Enjoying software development only when code is working

Creative and critical thinking

Thinking about coding when sleeping?

WEAKNESS

Very technical, barely theoretical

Don't understand business

LANGUAGES

Greek
English

HOBBIES

Travelling
Video Games
Volleyball
Movies
Comics
& Lots more

INTEREST IN

Software
Engineering
Artificial
Intelligence

PROJECT/DISSERTATION (Bachelor's)

IOS application built on swift framework.

Technologies used: Optical Character Recognition (Apple Vision), Mail compose protocol, machine learning for emotion detection on text python NLP, Flask server with API.

Built an IOS Application that takes a picture of text and converts it into text using Apple Vision. The user can compose the text into an email and then send it to the scanned address. Before sending the email, the emotion detection API will trigger and send the text to the Flask server triggering the emotion detection model to predict and provide a result of the text to be included in the email. The app is also able to automatically create a to-do list from a picture and schedule local notifications.

SKILLS

Technical	Technical	Software
React.JS	SwiftUI	Windows/MacOS
Python AI/ML	Java	XCode/ Visual Studio Code
C++	R	RStudio/ Spyder

EDUCATION

High School Diploma

Pancyprian Lyceum of Larnaca, Cyprus

Emphasis on Positive Sciences, Applied Mathematics, Physics and Computer programming

Bachelor's Degree

09/2019 – 06/2022

Brunel University London, United Kingdom

Graduated with a degree of First Class Honours (1:1) in Computer Science

WORK EXPERIENCE

Military Unit Centre

Military of Cyprus

- Handled money transactions for military personnel
- Update register logs and performed inventory count on stock
- Supervised trainees

Infantry Soldier

Military of Cyprus

- Maintained 100% accountability of all assigned equipment worth more than 100 000€
- Produced reports for equipment status, incidences, personnel, readiness, and intelligence for supervisors
